

LOWERED POSITION

In its lowered position the Quickwash is the perfect height for wheelchair users.

RAISED POSITION

In its raised position, the Quickwash can be used by ambulant users.

COMPACT

The Quickwash bracket is compact, and includes a stable shelf for easy access to hygiene items.

QUICK WASH BASIN

A basin for all users

The Quickwash basin offers a choice of two heights enabling users with varying needs to use the basin. It is manually adjustable, requiring no electrical supply, and easily adjusted between the two positions by a simple lever.

The Quickwash is the perfect solution for where there are multiple users with differing needs, for example in a shared bathroom where wheelchair and ambulant users are using the same basin. It has a compact design making it suitable for smaller bathrooms, and is specially designed to allow full access for wheelchair users.

The Quickwash is simple and quick to install and, requiring no special plumbing arrangements, and can be used to replace a standard basin.
