

### STRAP POCKETS

Strap pockets are provided for the shoulder and leg straps to prevent damage when the sling is in a wheelchair or day care chair.

### HIP LOOPS

Hip loops are provided enabling hip tapes to be added at any time in the life of the sling.

### ADJUSTABLE SUPPORT

Adjustable head support straps enable the head support to be adapted to individual needs.

## N.HANCE® DELUXE SPACER SLING

### A versatile and comfortable in situ sling

The Deluxe Spacer sling provides ultimate support and comfort for users. The silk lined leg section cocoons the thighs, providing support, and due to its unique structure does not ruck up or bunch whilst being applied.

Manufactured from a dual layer breathable Spacer fabric, the Deluxe sling can be left in a wheelchair for limited periods of time. It is available in a range of sizes from Extra Small to Extra Extra Large.

The sling is perfectly proportioned and offers support for users who go into extension, the head support is adjustable giving a degree of personalisation, and the leg design means that it is suitable for certain amputees. The Deluxe Spacer sling can be fitted with a chest strap pocket and hip tape loops, meaning that these can be specified as required. Both items are standard extras and available from stock.

**Disclaimer:** Prior to use, a documented risk assessment and care plan must be completed to ensure the safety of the user and carers. If you are in any doubt about the suitability of the sling, contact a qualified healthcare professional for an independent assessment. N.hance® slings are for use with 'loop type' spreader bars and should not be used on 'wishbone type' spreader bars. If you are in any doubt as to the compatibility of an N.hance® sling with the hoist that you are using, contact a qualified healthcare professional.
